Grade: _____ Age: _____

Parents

Name: _____

Address: _____

Zip: _____

Give the account number and location where your parent(s) or legal guardian(s) are currently receiving electric service from Farmers' Electric Cooperative: _____

I. USE THE DROPDOWN MENU
TO PICK THE CORRECT CHOICE:

- 1) Who owns and controls your rural electric cooperative?
- 2) Rural electric cooperatives pay Federal Income Taxes.
- 3) Rural electric cooperatives are non-profit organizations.
- 4) The Rural Electrification Program was developed because private electric companies did not want to extend their lines into rural areas.
- 5) Pollution control for generation systems is relatively simple and inexpensive.
- 6) In a rural electric cooperative, each member receives one vote for each meter connected in their name.

- 5) Currently 40% or more of our energy needs are met by foreign imports. What problems or dangers do you see occurring because of our dependence on foreign oil?

- 6) In your lifetime you will see a transition from a largely fossil fuel (oil, gas, and coal) dependent society to one dependent upon other sources of energy as well. What energy source do you feel will be used to generate electricity thirty years from now?

- 7) What is conservation, and what role will conservation play in the future energy demands of the United States?
